

BLUME'S[®]

GRAVITY SINKS

Put Gravity on your side, with the "Gravity Sink™"

With the "Gravity Sink™" you have contiguous lines at the "Stone to Stainless" transition point. This means there is no need for the old toothbrush to clean these areas.

The "Gravity Sink™" is recessed into the countertops, where it sits on a lip that is cut with a special profile tool.

The "Gravity Sink™" is set in place securely with an epoxy and does not require mounting hardware.

Unlike with a traditional top mounted sink, the 25 ° bevel profile allows smooth obstruction free access into the sink and eliminates chipping of the stone at the entrance of the sink.

***Gravity sink is on display in our showroom
Can only be mounted in Quartz and Granite**

AVAILABLE IN THREE SINKS

***SINGLE BOWL**

***DOUBLE EQUAL BOWL**

***BIG BOWL/LITTLE BOWL 60/40**
